Collegiality and Bureaucracy in the Modern University: The Influence of Information and Power on Decision-Making Structures

The book "Collegiality and Bureaucracy in the Modern University: The Influence of Information and Power on Decision-Making Structures" explores how information and power influence decision-making structures in higher education. It examines the role of collegiality in modern universities and how it has evolved over time. The book also discusses the impact of bureaucratic structures and practices on decision-making processes.

In the 1980s, James L. Bess published "Collegiality and Bureaucracy in the Modern University: The Influence of Information and Power on Decision-Making Structures." This work highlighted the importance of collegial decision-making and its influence on governance and efficient administration. It also examined how power influences over universities and the role of bureaucracy in decision-making.

The book addresses the question of whether modern universities have adapted to the changing landscape of higher education. It considers the role of collegial forms of governance compared to bureaucratic structures. The author explores how the balance between collegiality and bureaucracy has evolved and how it affects decision-making processes.

The book also examines the role of information in decision-making. It discusses how information flow and consultation influence decision-making processes in universities. The author argues that collegiality is an essential component of effective governance and decision-making in higher education institutions.

Overall, "Collegiality and Bureaucracy in the Modern University: The Influence of Information and Power on Decision-Making Structures" remains a significant contribution to the field of higher education governance and decision-making. It provides valuable insights into the evolving roles of collegiality and bureaucracy in modern universities.
