Britney Smith, a Grade 9 learner from Benoni, has developed a novel idea of making economic and management sciences (EMS) more engaging and relevant for learners. Her approach involves straightforward planning and assessment, ensuring that learners progress through the Senior Phase. This holistic method is especially useful for students who struggle with poor performance.

Social studies, history, and geography curriculum shares a common interdisciplinary subject that draws upon economics, management, and financial literacy. Human activity, and to explain the interactions that occur in an increasingly global world, understanding the ability of individuals to use knowledge and skills to manage limited financial resources is crucial.

Social studies is an interdisciplinary subject that draws upon economics, management, and financial literacy. Human activity, and to explain the interactions that occur in an increasingly global world, understanding the ability of individuals to use knowledge and skills to manage limited financial resources is crucial.

Economics is a social science that examines how people choose among the goods and services available to them. Understanding the interactions between human activity and financial systems is vital for the success of individuals, businesses, and economies.

The Grade 1 to 8 social studies, history, and geography curriculum shares a common interdisciplinary subject that draws upon economics, management, and financial literacy. Human activity, and to explain the interactions that occur in an increasingly global world, understanding the ability of individuals to use knowledge and skills to manage limited financial resources is crucial.
